Blaz Korecic

bkorecic bkorecic

Summary

Software Engineer at Alicanto Labs, working on optimization software for strategic mine planning. Currently pursuing a Master's degree in Computer Science. Interested in algorithms and data structures, software development, education, mathematics, security, and embedded systems.

Education

Universidad de Chile — *Santiago, Chile*
M.Sc. | *Computer Science* — *2024 – Present*
Advisor: Prof. Gonzalo Navarro

Universidad de Chile — *Santiago, Chile*
P.Eng. | *Computer Science and Engineering* — *2022 – 2023*
Advisor: Prof. Gonzalo Navarro

Universidad de Chile — *Santiago, Chile*
B.Sc. | *Computer Science and Engineering* — *2018 – 2021*

Experience

Alicanto Labs — *Santiago, Chile*
Software Engineer — *2026 – Present*
- Work on the core engine of Alicanto Solver, an optimization engine for large-scale production scheduling of open-pit and underground mines, used by major mining companies worldwide.
- Bring optimization algorithms from academic research into production, where performance and correctness are critical.
- Make software architecture decisions, focusing on long-term maintainability and extensibility.

Inria — *Paris, France*
Research Intern — *2024*
- Collaborated with an international research team for three months.
- Participated in various academic projects, including topics like hardware security, embedded systems, IoT and multi-robot systems.

Instituto Sistemas Complejos de Ingeniería — *Santiago, Chile*
Software Developer — *2023 – 2024*
- Developed a multiplayer browser-based application used to run economic behavioral experiments, supporting research on "*Tradable Consumption Rights: An Experimental Study of Market-Based Redistribution*" (working paper).

Millennium Institute Foundational Research on Data — *Santiago, Chile*
Software Engineering Intern — *2022*
- Modernized a C++ project.
- Reimplemented compression and search algorithms for large string dictionaries.

SARCAN — *Santiago, Chile*
Software Engineering Intern — *2021*
- Developed a web application for performing CRUD operations on a database and interacting with an optimizer.
- Created a static website with Hugo for internal company documentation.

Easy Program Checking — *Santiago, Chile*
Developer — *2020 – 2021*
- Developed features for an open source Django web application used to grade students' assignments in computer science courses.

Universidad de Chile *Santiago, Chile*
Teaching Assistant *2020 – 2025*
- CC4005 Competitive Programming (2021 to 2025).
- CC3101 Discrete Mathematics for Computer Science (2023).
- CC3301 Systems Programming (2021, 2022 and 2024).
- CC3003 Algorithms and Data Structures (2020 and 2021).

Publications

- **Ultra-Low Power DNN-based TSCH Scheduling at the Edge using the MAX78000.** *Martina Balbi, Erman Okman, Blaz Korecic, Lance Doherty, Thomas Watteyne.* Accepted by the 3rd International Conference on Embedded Systems and Artificial Intelligence (ESAI).
- **Single-Chip Motes and SRAM PUF: Feasibility Study.** *Sara Faour, Blaz Korecic, Mališa Vučinić, Filip Maksimovic, David C Burnett, et al.* In proceedings of the 2024 IEEE Workshop on Crystal-Free/-Less Radio and System-Based Research for IoT (CrystalFreeIoT).

Volunteering

Chilean Competitive Programming Society (progcompCL) *Chile*
Co-founder & President *2025 – Present*
- Co-founded and preside over a non-profit organization that promotes competitive programming across Chile, sharing responsibility for its administration and finances.
- Organize the Chilean ICPC Winter Training Camp **(CIPC)**, a free annual winter school attended by over 100 university students nationwide (organizer since 2024).
- Support the organization of the Chilean Olympiad in Informatics (OCI) and the ICPC in Chile.

Computer Science Department Student Council (CaDCC) *Santiago, Chile*
- Helped organize student activities throughout the year as a council member. *2024*

Chilean Olympiad in Informatics (OCI) *Chile*
- Organize and set problems for Chile's premier programming competition for secondary school students, which serves as the national qualifier for the International Olympiad in Informatics (IOI). *2021 – Present*

Preuniversitario José Carrasco Tapia *Santiago, Chile*
- Taught mathematics at an institution that assists economically disadvantaged students in accessing higher education. *2020*

Achievements

International Collegiate Programming Contest
- **ICPC 2023:** Placed 7th in the South America/South finals. Second place in Chile. Qualified to the 2024 ICPC Latin America Championship in Guadalajara, Mexico.
- **ICPC 2021:** Placed 6th in the South America/South finals. First place in Chile.
- **ICPC 2019:** Placed 16th in the South America/South finals. Third place in Chile.
- **ICPC 2018:** Placed 31st in the South America/South finals. Sixth place in Chile.

IEEExtreme
- **IEEExtreme 18.0:** Placed 45th out of 8785 teams worldwide.
- **IEEExtreme 15.0:** Placed 21st out of 2402 teams worldwide.
- **IEEExtreme 13.0:** Placed 116th out of 2534 teams worldwide.

Skills

- **Programming:** C, C++, Python, JavaScript, TypeScript, Java, SQL, Bash, Scheme, Lua, OCaml.
- **Frameworks:** React, Next.js, Astro, Django, Flask, FastAPI, Qt.
- **Other:** Docker, Linux, Git, GitHub Actions, Firebase, AWS, DigitalOcean, Slurm (HPC).

Languages

- **Spanish:** Native
- **English:** Advanced
